

REQUIREMENT MANAGEMENT

SERVICE FLYER

An alchemy for Success

PMCC ensures project success by embedding a powerful requirement management technique that is applicable for various projects in different industries. These approaches are diligently tailored to serve specific project needs.

A requirement management plan develops the strategy from its foundation to its execution that would define how you would receive, analyse, document and manage all the requirements within the project. In the plan, the key resources are identified within the project team including with the contractors and the client.

We will support an administrative review session with the client, suppliers and the contractors. From these review sessions, the audit schedules are arranged with the independent assessors which the entire process shall be established to ensure it is communicated well with external and internal stakeholders.

We will then move into Exploring, Identifying, Documenting all the requirements from the contractual document and tagging them against each project lifecycle. A tracker shall be used to monitor, control, and verify the content of the requirements against the contractual deliverables. Any gaps that were found shall be communicated formally to the client.

In some cases, a change request management is required, which we will build the structure, and derive the process that is aligned with the project standards. We will support in administering and managing the change request process.

To ensure that full compliance to the contractual deliverables, we will also ensure the submission of all documents from the design stage, construction, testing & commissioning and handover captures the traceability of the requirements. We will also validate the deliverables of the requirement either through reports, test results, and also operational documentation.

Our team are trained to use the requirement management tools such as ComplyPro, Doors, etc to login the requirement including building the traceability matrix, and as such able to provide the complete package to your project.

SECTORS COVERED FOR THIS SERVICE

Manufacturing & Infrastructure, Energy, Technology & Communications, Transportation and Building & Properties

WHO WE ARE

Established in 2007, we are dedicated to deliver effective solutions to complicated business challenges.
