

WHO WE ARE & WHY US?

PMCC was founded in 2007 and over the last two decades we have obtained valuable experience from EPC project management and system engineering with a highly diverse and competent team.

We are the experts in our field and now integrate AI to raise efficiency, productivity and quality upholding our excellent reputation as **"Your Trusted Project Partner"**. We master new technologies to exceed client expectations and maintain our reputation for excellence.

At PMCC, **we don't just manage projects – we drive them to success.** Backed by 30+ years of innovation and expertise, we deliver tailored solutions that exceed expectations and align with your vision.

Trusted for our consistency, precision, and performance – clients return because we deliver.

WHAT WE DO

It's the Planner – Not the Tool!

- **We cover** the entire project life cycle with Planning, Monitoring, and Control, from one-page strategies to thousands of detailed step-by-step activities, incorporating 4D and 5D linking and resourcing.
- **We are experts** with planning tools and understanding performance metrics, the right working sequence and we ensure the schedule is communicated and understood by the team.
- **Our deep understanding** of project details allows us to conduct health checks, optimise resources and utilise AI-supported decision-making in traditional or agile environments.
- **Having a plan** is just the beginning. Monitoring & Control with proper tracking, CPM Analysis & EVM or even Forensic Analysis and reporting is critical. We keep your projects on track.

PLANNING, MONITORING & CONTROL
