

WHO WE ARE & WHY US?

PMCC was founded in 2007 and over the last two decades we have obtained valuable experience from EPC project management and system engineering with a highly diverse and competent team.

We are the experts in our field and now integrate AI to raise efficiency, productivity and quality upholding our excellent reputation as “Your Trusted Project Partner”. We master new technologies to exceed client expectations and maintain our reputation for excellence.

At PMCC, **we don't just manage projects – we drive them to success.** Backed by 30+ years of innovation and expertise, we deliver tailored solutions that exceed expectations and align with your vision.

Trusted for our consistency, precision, and performance – clients return because we deliver.

WHAT WE DO

It's the Planner – Not the Tool!

- **We cover** the entire project lifecycle with Planning, Monitoring and Control – from one-page strategies to step-by-step activities, incorporating 4D and 5D linking and resourcing.
- **Expert Use of Tools:** We apply advanced planning tools, performance metrics and sequencing methods to ensure schedules are communicated clearly and understood by the entire team.
- **Deep Understanding:** Our knowledge of project details enables us to conduct health checks, optimise resources and leverage AI-supported decision-making in both traditional and agile environments.
- **Critical Control:** Having a plan is only the beginning – we ensure proper monitoring and control with CPM analysis, EVM and forensic reporting to keep projects on track.
- **With expertise and precision,** we deliver planning and control that ensures projects are aligned, efficient and successful.

PLANNING, MONITORING & CONTROL

CO-CREATING PROJECTS OF THE FUTURE
